EXPERIENCE

Full-stack developer | C#/.NET, ABP Framework, Angular/TypeScript, MySQL, Docker

Payhasly Creation Studio | Oct 2023 - Present, Ashgabat, Turkmenistan

Support of the core system app of "Ashgabat City Telephone Network" telecommunications provider at the launch stage

- Fixed almost all the bugs related to both UI and Backend of the app in coordination with the Customer Support team and client company employees.
- This led to a dramatic decline in the number of complaints filed to the Customer Support Department and normalized the working hours of its members.

Added Customized Two-Factor Authentication to the core system app of "Ashgabat City Telephone Network" telecommunications provider

- Added a Two-Factor Authentication feature with customization at the client's request for security reasons.
- This decreased the number of security-related incidents among cashiers and other personnel of the client company.

Restructured and enhanced Contract Tariff Status handling in the core system app of "Ashgabat City Telephone Network" telecommunications provider

- Restructured and enhanced Contract Tariff Status handling functionality, which is one of the core functionalities of the entire system. It is responsible for payments, calculation of charges, activation/deactivation of communication services, and subscriber accounting.
- Fixed a performance bottleneck in background job execution related to Status handling by reshaping the job scheduling logic.
- This brought down the time complexity of the status handling algorithm from exponential to quasi-linear (logarithmic).

Full-stack developer | PHP/Laravel, Python/Django, HTML/CSS/JS, VueJS3

Sanly Tilsimat | Oct 2021 - Oct 2023, Ashgabat, Turkmenistan

Full-Stack website projects

- Completed multiple projects, coordinating directly with designers and customers.
- This led to increased productivity and revenue, and also expanded the firm's client base.

Enhancement and maintenance of SanlyCRM app

- Added new features to the app, which was acquired in a ready-to-use state, fixed bugs, and adapted it to local requirements for further sale.
- This increased the app's competitiveness and resulted in the first customer for the app.
