EXPERIENCE

Full-stack developer | C#/.NET, ABP Framework, Angular/TypeScript, MySQL, Docker

Payhasly Creation Studio | Oct 2023 - Present, Ashgabat, Turkmenistan |

Core system app of "Ashgabat City Telephone Network" telecom provider

Support at the launch stage

- Fixed most of the bugs related to both UI and Backend of the app in coordination with the Customer Support team and client company employees.
- This led to a dramatic decline in the number of complaints filed to the Customer Support Department and normalized the working hours of its members.

Customized Two-Factor Authentication

- Added Two-Factor Authentication feature with customization at the client's request for security reasons.
- This decreased the number of security-related incidents among cashiers and other personnel of the client company.

Restructuring and Enhancing Fee Calculations Part

- Restructured and enhanced Fee Calculations Part, which is one of the core functionalities of the entire system. It is responsible for payments, calculation of charges, activation/deactivation of services, and subscriber accounting.
- Fixed a performance bottleneck in background job execution related to Fee Calculation by reshaping the job scheduling logic.
- This brought down the time complexity of Fee Calculation algorithm from exponential to quasi-linear (logarithmic) by reducing the number of recalculations to minimum.

Full-stack developer | PHP/Laravel, Python/Django, HTML/CSS/JS, VueJS3

Sanly Tilsimat | Oct 2021 - Oct 2023, Ashgabat, Turkmenistan

Full-Stack website projects

- Completed multiple projects, coordinating directly with web designers and customers.
- This led to increase in firm's productivity, revenue the client base.

Enhancement and maintenance of SanlyCRM app

- Added new features to the app, which was acquired in a ready-to-use state, fixed bugs, and adapted it to local requirements for further monetization.
