## EXPERIENCE

### Full-stack developer | C#/.NET, ABP Framework, Angular/TypeScript, MySQL, Docker

**Payhasly Creation Studio | Oct 2023 - Present, Ashgabat, Turkmenistan**

#### Support of the Billing app at the launch stage

- Fixed almost all the bugs related to both UI and Backend of the app in coordination with Customer Support team and client company employees.
- It led to dramatic decline in number of complaints filed to Customer Support Department and normalization of working ours of its members.

#### Added Customized Two-Factor Authentication to the Billing app

- Added Two-Factor Authentication feature with customization at request of the client for security reasons.
- It decreased the number of incidents related to security among cashiers and other personnel of the client company.

#### Restructured and enhanced Contract Tariff Status handling in Billing app

- Restructured and enhanced Contract Tariff Status handling functionality which was one of the core functionalities of the whole system. It is responsible for payments, calculation of charges, activation/deactivation of communication services, accounting of subscribers.
- Fixed performance bottleneck in background jobs execution related to Status handling by reshaping the job scheduling logic.
- It brought down the time complexity of status handling algorithm from Exponential to Quasi-linear (logarithmic).

### Full-stack developer | PHP/Laravel, Python/Django, HTML/CSS/JS, VueJS3

**Sanly Tilsimat | Oct 2021 - Oct 2023, Ashgabat, Turkmenistan**

#### Full-Stack website projects

- Completed multiple projects coordinating with the designers and customers directly.
- It led to increase in productivity and revenue, and it also expanded the client base of the firm.

#### Enhancement and maintenance of SanlyCRM app

- Added new features to the app which was acquired in ready-to-use state, fixed bugs and adapted to local requirements for further sale.
- It increased the competitiveness of the app and led to the first customer for the app.
